Complete protection for critical equipment

Manufacturing units, especially process industries, have critical equipment such as boilers and pressure plants which are subject to high temperatures and intense pressure. The slightest error not only results in the equipment failure but also can damage the surrounding property. Owners of industrial units can ensure protection in the event of such disasters through the Boiler and Pressure Plant Insurance Policy.

Presenting the Boiler and Pressure Plant Insurance Policy

This policy is designed to cover various types of boilers and pressure plants against the risk of any loss and/or damage due to explosion or collapse.

What does this policy cover?

The policy covers boiler and other pressure plants against the following contingencies:

- Damage to the boiler and/or pressure plant due to explosion or collapse
- Damage to your other property arising out of above accident

- Legal liability towards damage to third-party property and/or personal injury arising out of above accident

What is the sum insured?

The sum insured under this policy should represent the new replacement value of the equipment inclusive of freight, dues, custom duty, if any, and the installation cost.

Basis of compensation

In case of partial losses, we reimburse the expenses you incur for restoring the damaged equipment to the condition in which it was immediately before the accident occurred. In case of total loss, the actual value of the property as reckoned before the accident is paid.

How is the premium charged?

The premium payable depends upon the type of boilers and age and availability of certification from the Boiler Inspectorate.
